

FOBA Turntables. Closer to full automation.

FOBA[®]
STUDIO TECHNOLOGY

Three-dimensional rendering tops the list of current trends for professional online visualizing. FOBA has created the perfect tool, the achievement digital photography has been waiting for.

TURNA turntable provides high-precision, reproducible motorized rotation of the object, and is complemented by a user-friendly, intuitive control software and a highly innovative, fully automatic imaging software, which can produce uploadable flash animations in .swf format in as little as 120* seconds.

The key to flexibility is modularity, and TURNA has much of it on offer. With its extensive range of creative fittings for setting up, holding or hanging objects TURNA has a solution for every type of object. All fittings are set up and dismantled quickly and easily, in the well-known FOBA manner.

FOBA TURNA has been developed by photographers for photographers. Its brilliant functionality is enhanced by an outstanding design.

* Time required for fully automatic recording of an object (e.g. shoe) after completion of light and all other settings. Value corresponds to 16 shots with viewer size 500 x 500 pixel.

FOBA TURNA
More than just a turntable.

FOBA turntable TURNA defines the interaction between precision, flexibility and automation anew.

Uploadable 3D flash animation
in just 120* seconds

Features

- High-precision geared motor. Encoder and high gear reduction provide extreme angular accuracy.
- Smooth, continuous rotation without jolts in both directions.
- 3 wheels for easy displacement, each wheel with individual, manual brake.
- Also for ceiling installation (TURNU, without plate), with 3 M8 bolts replacing the wheels.
- Synchronisation for: Horseman Shutter, Rolleiflex Shutter, Hasselblad, Canon, Nikon

Technical data

Height:	30 cm
Weight:	41 kg / 90 lb
Input voltage:	110 V or 230 V
Rotating speed:	1,5 rpm
Diameter:	60 cm
Max. load:	50 kg / 110 lb

FOBA TURNA

Control Software T-Ctrl

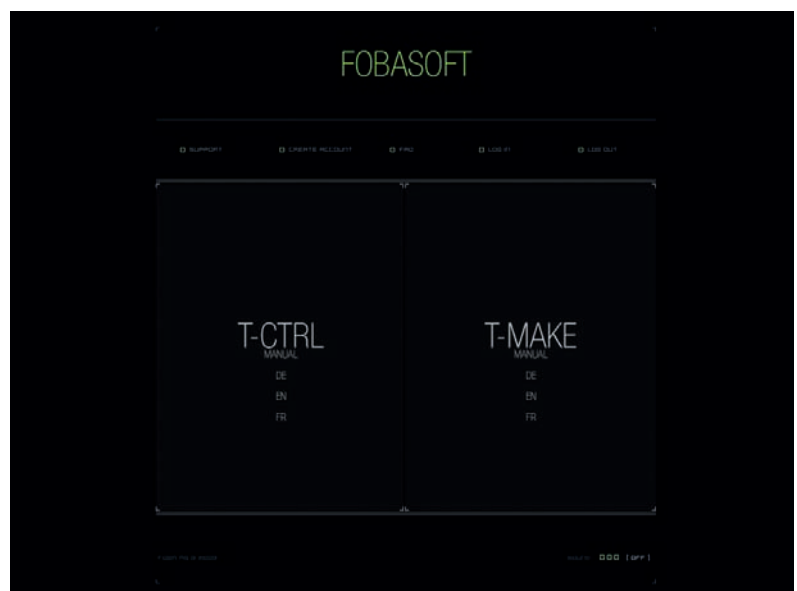

FOBA T-Ctrl: A paragon of flexibility and intuitiveness which gives your workflow enhanced productivity.

TURNA functionality is accessed with ease and in comfort from your desktop or laptop screen. FOBA T-Ctrl control software is an intelligent tool which allows you to define, control and edit your workflow. Specific correction of individual frames optimizes workflow productivity.

The user-friendly interface reflects a professional's years of experience in this domain. Standard functions are presented clearly. Current status and recording process are displayed graphically.

Features

- Graphic status display with mouse navigation
- Fully automatic recording with graphic process display
- Correction/res shooting of individual frames with setting of reference point
- Setting of starting point with mouse
- Adjustable number of captures, rotating direction, speed, brake and acceleration ramps
- Shooting rate (Captures) adjustable between 2-360

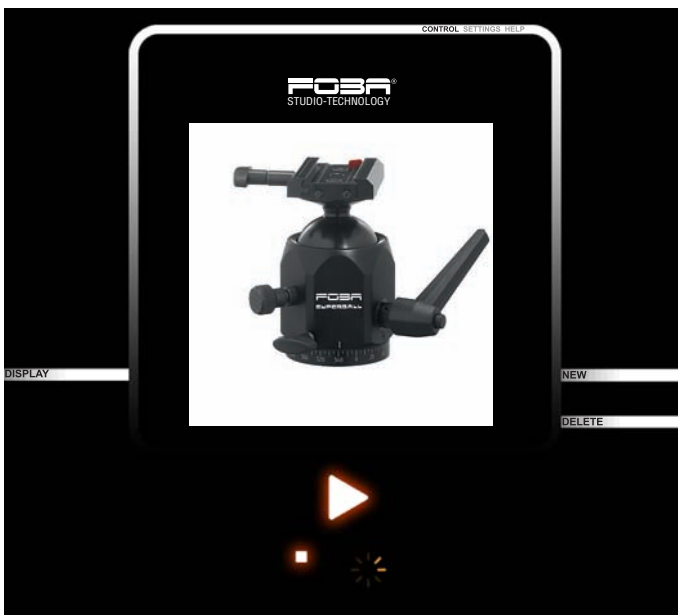

System requirements:

- Mac OS 10.5 or above
- PowerPC® G5 or Intel® Multicore processor
- 512 MB RAM (recommended: 1 GB)
- 2 GB hard disk space

User guides, FAQ, templates and more always up to date on www.fobasoft.com

FOBA TURNA
More powerful.

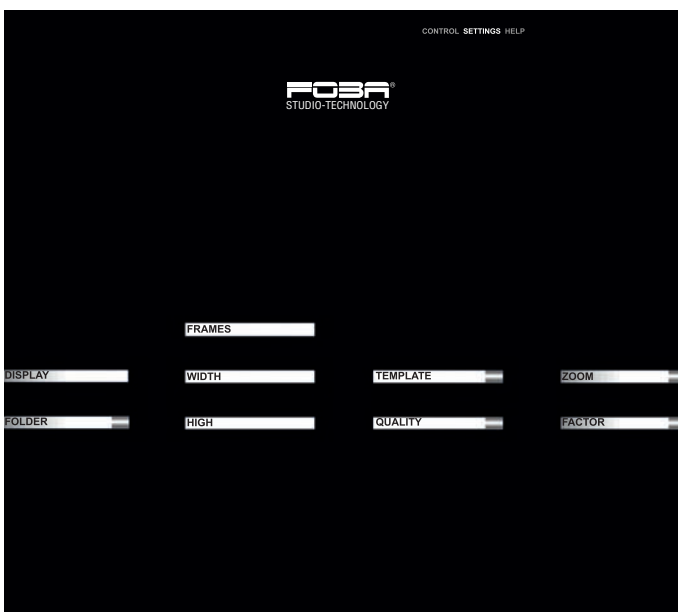

Quick, easy, cost-efficient: FOBA's authoring software T-Make creates animations in .swf format with one mouse click.

TURNA's impressive functionality is further enhanced by FOBA's flash maker tool T-Make. No scripting experience is required to create within the shortest time 3D automated imaging files, complete with an intelligent folder structure for easy uploading, which can be displayed directly in most current browsers and under current operating systems.

Show objects in 360° automated view using the templates provided (more templates available online under www.fobasoft.com). Customize such parameters as number of frames, viewer size or zoom factor to suit your requirements. The system processes .tif and .jpg formats.

FOBA T-Make frees you from the constraints of time-consuming and exhausting digital processing so that you can concentrate on bringing your creative drive to life in your photographic work.

Features

- Templates
- Selection of number of frames
- Selection of size and zoom factor
- Selection of jpg output quality
- Creates 3D flash files ordered within an intelligent folder system for immediate uploading

System requirements:

- Mac OS 10.5 or above
- PowerPC® G5 or Intel® Multicore processor
- 2 GB RAM (recommended: 4 GB)
- 2 GB hard disk space
- Adobe Flash® CS3 or higher

FOBA TURNA
More professional.

Modular accessories and fittings

Good design is not only a question of aesthetics, but requires accomplished functionality. FOBA's engineers develop the TURNA accessory range in close collaboration with experienced professionals, in a process that is continuous and permanent. Manufacturing is consistent to the company's traditional finishing precision – made in Switzerland, of course.

A perfect match

TURNA's versatility and usefulness is enhanced by an extensive range of modular add-ons, which reflect a professional's requirements not only concerning the object pictured, but also regarding ease of use, efficiency and cost-effectiveness.

A selection of accessories available at the moment:

TURTE Translucent acryl supporting plate, Ø 70 cm. Mounted directly on the turntable or on one of the shafts. Centred load capacity 20 kg / 45 lb.

TURTA Aluminium supporting plate, Ø 60 cm. Mounted directly on the turntable or on one of the shafts.

TURTU Aluminium supporting plate, Ø 30 cm. Mounted directly on the turntable or on one of the shafts.

TURAT Additional traction fitting, with clamps, e.g. for watches with extended wristband.

TURAE Fitting for stud earrings (hanging earrings only on ceiling-mounted TURNU). Acrylic glass shaft with Ø 1 mm through hole.

TURSU Aluminium shaft, 46 cm, threaded M8 on both ends.

TURSA Aluminium shaft, 68 cm, threaded M8 on both ends.

Modular accessories and fittings

Particularly in the field of 3D imaging for commercial purposes, with its unlimited choice of possible objects, FOBA's legendary flexibility is a valuable asset. Specific, custom-made solutions will contribute to the continuous upgrade of the accessory range.

Let us know what you are looking for. FOBA engineers always look forward to new challenges.

TURAV Special support for bicycle or similar object, max. load 15 kg (33 lb).

TURAL Support for 2 lamps. To be fitted directly to the shaft TURSA. Adjustable height. Allows bottom lighting, e.g. through the translucent acryl plate TURTE.

TURAC Fitting for necklace, only on ceiling-mounted TURNU. Adjustable clearing, max. 25 cm.

TURAS Support for shoe, adjustable on 3 axis, swivels to 90° vertical. Allows imaging of top and sole in one go.

TURAA Star-shaped fitting, aluminum, with integrated supporting wheels. Designed for heavier or larger objects; Ø 120 cm.

TURAP Additional pressure fitting for arc-shaped fitting TURUS, set of 4. The points reduce contact surface to a minimum (no picture).

TURBU Adapter for torso support, Ø 25 mm. Further adapters custom-made on request (no picture).

TURUS Arc-shaped fitting, adjustable, to hold the object with traction or pressure. Requires TURAT (traction) or TURAP (pression) additional fittings. For not self-supporting objects (no picture).

TURBE Curved diffuser panel, movable, custom-made to specifications (no picture).

FOBA Philosophy

A truly exceptional product is the result of a creative alliance between state-of-the-art technology and vision.

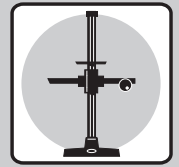

For 70 years FOBA has been supplying high-quality, modular, sturdy and reliable studio equipment to professional photographers all over the world. The company's claim to fame includes well-known product ranges such as COMBITUBE, ceiling rails, stands, tripod and heads, shooting tables, and more. FOBA's new turntables range brings previously unimaginable flexibility to 3D imaging and automation. Like all FOBA products, FOBA turntables are made in Switzerland according to the company's traditional manufacturing methods. First-class materials are processed with craftsmanship. FOBA's legacy of successful studio equipment guarantees practical, efficient products.
